www.dykstralabs.com
- Product info:** www.inntrap.com
- Available:** February 6, 2017
- Description:** Part-time position, 15 hrs/week, flexible hours, willing to work around student schedule. Position is ideal for a Santa Fe College or University of Florida student. Laboratory-based.
- Who we are:** Since 1997, Dykstra Laboratories, Inc. has been a scientific laboratory that focuses on the interactions between electromagnetics and life. The current laboratory project involves researching and developing a better moth trap for use in the stored product industry. The laboratory is located in Gainesville, Florida, just off of I-75.
- Requirements:**
- Must have own transportation
 - Should be comfortable working with insects
 - Should have no misgivings about freezing excess insects on a daily basis
 - Must be willing to sign a non-disclosure form prior to employment
 - Send resume and call the laboratory, possible interview to follow
- Responsibilities:**
- Make moth media for our moth colonies
 - Clean laboratory glassware and plasticware
 - Remove insect pupae for experiments
 - Microscope work
 - Data entry
 - Preparing experiments
 - Assist Laboratory Director in occasional projects
- Compensation:**
- Hourly wage of \$8.05/hour
 - No insurance benefits available
